PROFESSIONAL PROFILE

Software Engineer with experience designing and developing secure, scalable web applications using **C#, ASP.NET Core, React, Next.js, Node.js, TypeScript, PostgreSQL, SQL Server, and MongoDB**.

My work spans frontend engineering, backend API development, database design, software architecture, and technical mentoring. I enjoy building products that solve real-world problems while applying modern engineering principles such as Clean Architecture, reusable component design, secure authentication, and RESTful API development.

Beyond software delivery, I contribute to the technology ecosystem through mentoring aspiring developers, delivering software engineering training, and supporting technology-focused community initiatives.

CORE TECHNICAL EXPERTISE

Programming Languages

- C#
- JavaScript
- TypeScript
- SQL

Frontend

- React
- Next.js
- Redux Toolkit
- Tailwind CSS
- CSS Modules

Backend

- ASP.NET Core
- .NET

- Node.js
- Express.js
- Entity Framework Core
- REST API Development
- JWT Authentication
- Role-Based Authorization

Databases

- PostgreSQL
- SQL Server
- MongoDB
- MySQL

Cloud & DevOps

- AWS EC2
- AWS Elastic Beanstalk
- AWS Lambda
- Git
- GitHub
- Vercel
- Netlify
- Postman

Engineering Practices

- Clean Architecture
- Repository Pattern
- SOLID Principles
- Database Design
- Agile Scrum
- Technical Documentation

PROFESSIONAL EXPERIENCE

Lead Backend Engineer

BanQi Digital Banking Platform

July 2025 – Present

Leading backend architecture and API development for a digital banking application focused on secure financial transactions and scalable service delivery.

Key Responsibilities

- Designed the backend architecture using **ASP.NET Core**, **C#**, and **PostgreSQL**.
- Structured the application following **Clean Architecture** principles with separate Domain, Application, Infrastructure, and API layers.
- Designed secure REST APIs for:
    - Customer onboarding
    - Authentication
    - Account management
    - Internal transfers
    - Transaction history
- Developed transactional workflows to ensure atomic debit and credit operations.
- Designed ledger and transaction entities for financial record keeping.
- Implemented JWT authentication and role-based authorization.
- Built database migrations using Entity Framework Core.
- Implemented idempotency strategies to prevent duplicate financial transactions.
- Collaborated on product planning and API design decisions for future banking capabilities.

Technologies

ASP.NET Core • C# • SQLServer • Entity Framework Core • JWT • Clean Architecture

---

Frontend Engineer

Election Monitoring Platform

March 2025 – Present

Developing the frontend for a real-time election monitoring platform designed to support result collation, monitoring, verification, and administrative reporting.

Key Responsibilities

- Building responsive dashboards using **Next.js**, **React**, and **TypeScript**.
- Developing secure role-based interfaces for election administrators and monitoring officials.
- Creating reusable UI components for election result management.
- Integrating frontend applications with REST APIs.
- Implementing authentication workflows, including multi-factor authentication flows.
- Supporting result collation, dashboard analytics, and monitoring interfaces.
- Working closely with backend developers to ensure seamless API integration and data consistency.

Technologies

Next.js • React • TypeScript • CSS Modules • Redux Toolkit • REST APIs

---

Front-End Engineer

TekHaven Solutions

October 2024 – July 2025

Worked as part of a multidisciplinary engineering team delivering modern web and mobile applications.

Key Responsibilities

- Developed scalable React applications using JavaScript and TypeScript.
- Built reusable frontend components.
- Collaborated with designers to implement responsive UI designs.
- Improved application performance and accessibility.
- Participated in sprint planning and technical discussions.
- Integrated frontend applications with backend services.

Full Stack Software Engineering Intern

SAIL Innovation Lab (CcHub)

September 2023 – July 2024

Worked on several software products while receiving intensive engineering training.

Projects Included

Digital Banking Application

- React Native
- React
- Node.js
- Express
- MySQL

Financial Services Portal

- React
- Tailwind CSS
- Local Storage
- EmailJS

Fitness & Wellness MVP

- React
- Tailwind
- RapidAPI

Artisan Marketplace

- HTML
- CSS
- JavaScript

Software Development Trainer

Broadcast Arts Institute

October 2021 – December 2023

Delivered practical software engineering training covering:

- JavaScript
- React
- Git
- HTML
- CSS
- Software Engineering Fundamentals

Responsibilities included:

- Curriculum development
- Student mentoring
- Project supervision
- Code review
- Technical assessments

PREVIOUS PROFESSIONAL EXPERIENCE

BanQi Digital Banking Platform

A modern digital banking platform currently under development.

Highlights

- Secure authentication
- Clean Architecture
- Transaction processing
- Ledger system
- Account management
- PostgreSQL
- ASP.NET Core

Election Monitoring Platform

Real-time election monitoring and result verification platform.

Highlights

- Role management
- Result collation
- Dashboard analytics
- Next.js frontend
- Authentication
- Responsive UI

Event Hall Booking Platform

https://event-app-ten-olive.vercel.app

Responsive venue booking platform built with React and Next.js.

SCRM Corporate Website

https://scrm-three.vercel.app

Corporate website built using React and JavaScript.

OPEN SOURCE & COMMUNITY

Innovation & Technology Specialist

Slum2School Africa

Software Trainer
